

TRANSCRIPTS

MY BROTHER'S GREATEST INVENTION

Let us listen (refer to page 105)

I You will listen to a conversation between Anita and Toby. Toby is a Martian and is stranded on Earth. He has become Anita's friend. As you listen, choose the **true** statements from 1–5.

ANITA : Hi, Toby! Do you miss your planet?

TOBY : Very much, Anita! I miss my people and home.

ANITA : Oh! I wish I could do something about it! But I am happy to have you as my friend.

TOBY : Thank you, Anita!

ANITA : Er... could you tell me something more about yourself?

TOBY : Why not! What do you want to know about me, Anita?

ANITA : What do you eat for breakfast?

TOBY : Well, we Martians don't need to eat anything. We get our energy from the Sun.

ANITA : Oh! Don't you ever feel like having ice creams and chocolates? I can't think of life without them!

TOBY : No, Anita! We are made of different stuff.

ANITA : Okay, tell me one thing. How are you able to see with only one eye? I see only one big eye in the centre of your face.

TOBY : My friend, we Martians need only one eye to see clearly. In fact, I can see even with my eye closed. I can see beyond mountains and clouds, wood and even metals. I can see that you are carrying a toy in your pocket. It's a blue aeroplane. Isn't it? And yes! That apple you just had for breakfast is going round-and-round in your stomach right now!

ANITA : (*gasps in disbelief*) Oh my goodness!

II Listen to the conversation again and fill in the blanks with the exact words you hear.

PAPER BOATS

Let us listen (refer to page 114)

You will listen to a conversation between a girl and her father about the art of paper folding called origami. As you listen, select the **true** statements from 1–7.

FATHER : Sai dear! What are you working on there with all that paper?

SAI : Baba, I am trying to make an origami crane, but it's a bit tricky. I keep messing up the folds.

FATHER : Ah, origami! I remember doing that when I was your age. You know, Sai, origami has a really interesting history.

SAI : Really? I thought it was just something fun to do with paper.

FATHER : It is fun, but it's also an age-old art form. Origami started in Japan over a thousand years ago. Back then, paper was really expensive, so it was only used for special occasions, like religious ceremonies.

SAI : Wow, I didn't know that. So, it wasn't just for doing crafts?

FATHER : It wasn't until the seventeenth century that people began making animals, flowers and other designs just for fun.

SAI : So, people have been making paper cranes for hundreds of years?

FATHER : Yes, and the crane is especially important in Japanese culture. It's a symbol of peace and long life. There's even a belief that if you fold a thousand paper cranes, you can make a wish, and it will come true.

SAI : A thousand cranes? That's a lot! But it sounds like a really nice tradition.

FATHER : It is. Origami isn't just about the final shape—it's about the process, the patience and the creativity involved. And over the years, it's spread all over the world, with people adding their own styles and techniques.

SAI : I had no idea origami had such a long history. It makes folding this crane feel even more special.

FATHER : I'm glad you think so, Sai. Perhaps we can start with something simpler next time. How about we make an

origami paper boat next? It's easier, and we can float it in the stream outside.

SAI : A boat sounds awesome! Let's do it! But first, I want to finish this crane. Can you help me with the last few steps?

FATHER : Of course! Let's finish this crane together. After that, we'll sail our paper boat.

NORTH, SOUTH, EAST, WEST

Let us listen (refer to page 131)

You will listen to a girl speak about the story of how Agartala got its name and the importance of *agar*. As you listen, choose the correct option for the questions given below.

Hi everyone,

We all know that Agartala is the capital of Tripura. But did you know how Agartala got its name? It's made up of two words: '*agar*', which is a type of tree, and '*tala*', meaning underneath. So, Agartala means 'under the agar tree'. These trees are also called aloeswood, eaglewood, or gharuwood. It is also referred to as 'wood of the gods'.

Agarwood, the wood from these trees, is really special. It smells amazing—like a mix of woody and flowery scents. It is one of the rarest and the most expensive woods in the world. People have used it for thousands of years in medicines, perfumes and rituals. It has been described as early as 1400 BCE in the Vedas. The Egyptians are believed to have used agarwood incense as part of their rituals more than 3,000 years ago.

Here's something even more remarkable—agarwood only forms when the tree is hurt or infected with a bug or virus. Instead of dying, the tree creates this dark, sticky, sweet-smelling substance called agar oil which protects it from further infection.

Agarwood is very important to people in Agartala. It's used to make perfumes, incense, and the hand carvings which Tripura is famous for.

And here's the best part: the tree was once almost extinct, but now, thanks to people taking care of it, you can find it in almost every house in northern Tripura. How great is that!
